

Communication

Date 29 September 2026
Team ID SWTID-2026-1551
Project Name Auto Ticket Classification using Flow Designer
Maximum Marks 1 Mark

Communication Plan:

Effective communication is essential for the successful development and demonstration of the Auto Ticket Classification using Flow Designer project. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Team Meeting / Chat	Project Team	Discuss ticket-classification progress and tasks
2	Progress Update	Weekly	Team Meeting / Report	Project Team	Review Flow Designer workflow and automation progress
3	Issue / Bug Discussion	As Needed	Chat / Meeting	Project Team	Resolve flow, condition, and ticket-classification issues
4	Stakeholder Review	Bi-Weekly	Review Meeting	Team & Stakeholders	Collect feedback on automated ticket classification
5	Final Demo Rehearsal	Once	Demo Session	Project Team	Validate the complete Flow Designer automation before final demo

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Incorrect ticket classification during testing	Reviewed flow conditions and updated classification logic.
2	Flow execution or configuration issues	Tested each flow step and corrected configuration errors.
3	Difficulty coordinating testing and feedback	Used regular updates and review discussions to track issues and feedback.
