

Technology Stack

Date: 29 September 2026

Team ID: SWTID-2026-1551

Project Name: Auto Ticket Classification using Flow Designer

Maximum Marks: 2 Marks

Define Your Technology Stack:

The project uses ServiceNow and Flow Designer to automatically classify incoming tickets based on ticket information such as category, description, and priority. The selected technologies support automation, centralized data storage, maintainability, and integration.

The table below details the technologies chosen for each component of the architecture and provides a brief justification for their use.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	ServiceNow UI / ServiceNow Portal	Provides the interface for users and agents to create, view, and
2	Backend / Server-Side	ServiceNow Flow Designer	Automates ticket classification and routing using flows, triggers,
3	Database / Data Storage	ServiceNow Platform Database (Incident / Task tables)	Stores ticket details, classification information, assignment, prior
4	Cloud / Hosting / Deployment	ServiceNow Cloud Platform	Provides a managed cloud environment for running the applicat data,
